MATERIALS

Valley Limestone Walls, Steps, and Boulders

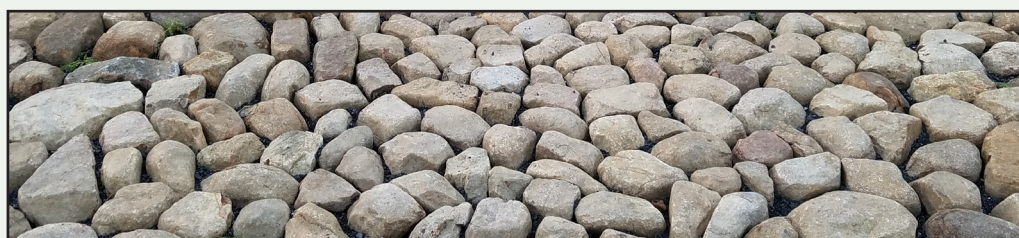

Pennsylvania Bluestone Walks, Patios, and Steps

West Virginia Sandstone Walls and Boulders

Brick Patios and Permeable Brick or Paver Driveways

Valley Cobblestone Drive

TIMELESS

Our masonry techniques harken back to a heritage steeped in quality. With regionally sourced stone we build walks, patios, and walls without mortar or concrete, continuing an ancient craft that stands the test of time.

Dry set stone and brick work provides design solutions and an opportunity to blur the line between hard and soft surfaces. Because mortar no longer seals the earth, soft greenery and a bold architecture of plants grow from a strong backbone of brick and stone - an interplay of opposites highlighting one another.

SERVICES

Entrance Walks
Garden Paths
Steps
